Miniature painting is a traditional style of art that is very detailed, often referred to as painting or working "in miniature". Because of their origins as illuminations, they are also painted to have as smooth of a surface as possible. Indian miniature paintings have always piqued global interest. Indian miniatures were profoundly influenced by Indian Mythological Literature and were executed as illustrations to texts or as individual paintings. They were small-scale highly detailed pictorial compositions, often providing a true record of the social and cultural life of the time. This time, Delhi's National Museum has lent 101 such paintings from its collection to the National Gallery of Australia, Canberra, for a month-long exhibition. Called "Ram Katha", the collection chronologically captures the story of the Ramayana.

"Ram Katha" is the Katha of God Ram, who is the 17<sup>th</sup> of Lord Vishnu's 24 incarnations.

The paintings done between the 17<sup>th</sup> and 19<sup>th</sup> century by artists from various schools of art in India, are themed on Lord Ram's life. "The Ramayana, composed by Valmiki in Sanskrit is believed to be the first known narrative of Indian literature. The paintings based on Ram Katha come from north, central and the east of India," says Vijay Kumar Mathur, the curator of the exhibition. It took him four months to curate the display from the museum's collection of 500 odd miniature paintings depicting the Ramayana.

The exhibits represent a matured movement in miniature art wherein the spirit of Ramayana has been researched upon and visualized in colours. "While this will be a treat for Indian spectators in Australia, it will also be a special way to introduce Indian culture among the Australian citizens," says Mathur. Starting on May 22, the exhibition will kick off the Festival of India in

Australia. All major styles of Pahari paintings (Basholi, Chamba, Kangra and Bilaspur) are on display, while Rajasthani styles include Mewar, Bundi, Jaipur, Bikaner and Deogarh. There are representations from central Indian styles of Malwa, Orchha, Datia and Rahogarh, besides specimens of Mughal style from Bundelkhand, Deccani and Bijapur and classical folk styles of Kalighat are also on display. Most of these styles originated between the 15th and 19th century. Some of the noteworthy works include The Portrait of Ram, (Basholi style, Pahari, 1730); Ram breaks Shiva's bow in the Court of King Janaka (Provincial Mughal style, Orchha, Bundelkhand, early 17<sup>th</sup> century); Wedding of Ram and Sita (Mandi style, mid-18th century); Ram, Lakshman and the golden deer (Kalighat style, Bengal, late 19th century); and Hanuman with Dronagiri mountain (Rahogarh style, Central India, late 18th century). The "Ram Katha" exhibition was first held at the National Museum in 2013. The same year it travelled to the Royal Museum of Art and History in Brussels, where it was on display for six months.

Akbar and Birbal, the two historic legends are said to have shared a great bond and have left some incredible stories for the ages ahead of them to hear and learn from. The stories are not only amusing but carry a strong message and pose questions on society, routine, rituals and practices strongly.

Birbal was a really wise and intelligent man, people used to admire him for his character and rich knowledge he possessed regarding every field. Almost all the decisions of the reign were taken after consulting him. He was one of the most important ministers and closest to Akbar. Birbal was just so very dear to Akbar, not just because of his skills but because of the way their bond had grown strong over the years.

During Emperor Akbar's reign, there was a poor man in Agra who was thought to bring bad luck. People believed that if anyone looked at his face in the morning, they would have a bad day.

"Get lost, you ugly fellow!" he would be cursed by one and all. "Hide your face before you kill someone with your evil eye!"

The Emperor soon heard of this man's reputation and wanted to see him. The poor fellow, who had not harmed a single person in his life, was brought to Akbar.

Akbar took a look at him and asked him to be brought back in the evening.

That particular day was especially full and tiring day for the Emperor and his courtiers.

So many matters had to be attended to, that Akbar even forgot to eat. By the end of the day, the emperor was exhausted. To make matters worse, Akbar was informed that his favourite child, little Prince Salim, had fallen ill.

Then the Emperor suddenly remembered that he had seen the face of the 'unlucky' man that morning. That was it. It was that man's entire fault, Akbar decided.

Akbar called his courtiers and told them that he was going to have the 'unlucky' man executed.

All of them agreed immediately.

All except Birbal. Instead, Birbal let out a short laugh.

"What's the matter, Birbal?" asked the emperor, "You seem to find something funny!"

"Nothing, your Majesty", replied Birbal.

"You say this man brings bad luck because you had to go without food ever since you saw him this morning.

Look at his luck. Yours was the first face he saw today and he has to die because of it."

Akbar immediately realised his folly and rewarded Birbal for his wisdom. The above story of a man with unlucky face is one such story where Birbal's quick wit and strong logical reasoning is showcased.

आत्मविस्तार का मतलब है हमारे पास जो कुछ अच्छा है उसे प्रकृति में बाँटे । प्रकृति विराट है और उसमें जड़-चेतन सारे प्राणी समाविष्ट हैं । मैं कुछ नहीं हूँ , किसी अदृश्य शक्ति का दिया हुआ उपहार हूँ । प्रकृति ने हमारे लिए सारे संसाधन जुटाए हैं प्रकृति स्वयं हमें उपहार के रूप में ग्रहण एवं स्वीकार करती है । हमें यह भली-भाँति समझना चाहिए कि अगर हम उसके लिए उपहार नहीं होते तो प्रकृति हमारे पालन-पोषण, सुरक्षा, संवर्धन के लिए इतने संसाधन नहीं जुटाती । प्रकृति हमारी हर सुख-सुविधा का ध्यान रखती है । प्रकृति के लिए हममें से कोई छोटा-बड़ा नहीं है । वह सब पर समभाव से स्नेह वर्षा करती है । यह सब निःशुल्क है । क्या कभी हम निःस्वार्थ भाव से किसी की सेवा-सहायता के लिए प्रस्तुत होते हैं ? प्रस्तुत होने की बात तो दूर , इन चीजों पर हमारा ध्यान ही नहीं रहता है । यहाँ तक

कि अनंतवत्सला प्रकृति को कुछ पल प्रेम से देखने के लिए हम कभी समय ही नहीं निकालते हैं। प्रकृति से साक्षात्कार नहीं होने के कारण मनुष्य अपनी मूल प्रकृति से कोसों दूर है। उसकी प्रवृत्ति प्रकृतिजन्य नहीं है अर्थात् वह अपने स्वभाव में नहीं है।

प्रकृति से यदि प्रेम करना सीखना है- हेलेन केलर से सीखो। जो न सुन सकती थी और न ही देख सकती थी परन्तु प्रकृति को अनुभव कर सकती थी। वो प्रकृति की सुन्दरता को अपनी बंद आँखों से महसूस करती थी। हर फूल-पत्ती को छूकर उसकी अद्भुत बनावट को महसूस करती थी। इस सुन्दर प्रकृति को ईश्वर का दिया अनमोल वरदान मानती थी। पर हम आँखे होते हुए भी कभी ईश्वर के द्वारा दिए गए इस अनमोल उपहार को न तो समझ पाते हैं और न ही उसके द्वारा दिए गए सन्देश को समझ पाते हैं। हमें भी प्रकृति की तरह निःस्वार्थ भाव से मानव सेवा करनी चाहिए।

(प्रश्न) निम्नलिखित में से सही विकल्प चुनिए :

(1×3=3)

(i) प्रकृति का स्वभाव कैसा है ?

- (क) अपने उपहारों को निःस्वार्थ भाव से सब में बाँटना (ख) अपने अस्तित्व को बचाना

- (क) प्रकृति से प्रेम करना (ख) प्रकृति को ईश्वर का वरदान मानना  
(ग) प्रकृति की सुन्दरता को देर तक निहारना (घ) विकल्प 'क' और 'ख'

(iii) प्रकृति स्वयं हमें किस रूप में ग्रहण एवं स्वीकार करती है ?

- (क) विनाशकारी मानव के रूप में (ख) उपहार के रूप में  
(ग) अभिशाप के रूप में (घ) स्वार्थी मानव के रूप में

(प्रश्न) निम्नलिखित प्रश्नों के उत्तर संक्षेप में दीजिए :

जीवन तो नाम है चिरंतन संघर्ष का

जीवन तो नाम है आशा और हर्ष का।

बाल भी बाँका कभी नहीं हो सकेगा तेरा

आशा और साहस की, दोनों पत्तवारें थाम,

मुड़ना नहीं पीछे, आगे बढ़ना तेरा काम

लड़ तूफानों से और गीत गा उत्कर्ष का।

इन उत्तुंग लहरों को, चरण तेरे छूना है,

देखकर संघर्ष तेरा, जोश हुआ दूना है।

39. Neuron is a nerve cell that is the basic building block of nervous system. The nervous system which comprises brain, spinal cord and nerves is composed of nervous tissue. Nerve cells are responsible for communicating information in both chemical and electrical forms. There are three basic parts of a neuron: dendrites, cell body and axon. Dendrites which are short and branched processes, receive information from sensory receptors or other neurons. This information is then passed down to the cell body and on to the axon. An individual nerve cell may be a metre long. Nerve impulses allow us to move our muscles when we want to. The functional combination of nerve and muscle tissue is fundamental to most animals.

India's contacts with the World have continued through ages but her relationships through the land routes are much older than her maritime contacts. The various passes across the mountains in the north have provided passages to the ancient travellers, while the oceans restricted such interaction for a long time. These routes have contributed in the exchange of ideas and commodities since ancient times. The ideas of the Upanishads and the Ramayana, the stories of Panchtantra, the Indian numerals and the decimal system thus could reach many parts of the world. The spices, muslin and other merchandise were taken from India to different countries. On the other hand, the influence of Greek sculpture, and the architectural styles of dome and minarets from West Asia can be seen in different parts of our country.
